PROFILE

Aspiring Computer Science student with passion for developing innovative solutions for complex & real world problems. I'm always eager to learn new skills which can eventually help me for personal & co-curricular development. Always ready to take challenges & provide optimistic solutions for the same.

EDUCATION

Bachelor of Engineering (B.E), MMCOE Pune
CGPA: 8.79/10

2022 - Present

SKILLS

Languages:	Python, C++, HTML, CSS, Javascript, SQL, Dart
Frameworks:	React.js, Node.js, Express.js, Flask, Flutter, React Native (Exposure)
Databases:	MySQL, MongoDB, PostgreSQL (Exposure)
Tools/Technologies:	Canva, Figma, Git, GitHub, Jupyter Notebook, Google Colab, Firebase, Supabase
Soft Skills:	Emotional Intelligence, Creative Thinking, Leadership, Communication, Teamwork

EXPERIENCE

Trainee Software Engineer
Equations Work Pvt. Ltd.

Jan 2025 - March 2025
Pune, MH

- Developed a fully deployable financial prediction 3D website with near real-time news processing - 98% accurate prediction to extract and structure insights from complex data.
- Handled the 3D canvas efficiently & reduced the latency in 3D object mapping by using Mediapipe, Babylon.js and visualized relationships in 3D using Neo4j

PROJECTS

- **GenAI Interactive Learning Games:** Built an AI-powered aptitude quiz platform using OpenRouter API, generating real-time MCQs across Verbal, Logical and Math categories with difficulty-level filtering. Implemented a dynamic scoring and badge system with user progress tracking and interactive frontend with Streamlit UI including Flask, leaderboard and user authentication.
- **SwagoffIndia: NGO - Volunteer Connectivity Platform:** A React Native based mobile application that connects NGOs, volunteers and coordinators through role-based workflows, enabling organizations to post location-based social drives, volunteers to register and verify participation via media uploads and coordinators to approve contributions. The app integrates Firebase for authentication and data management, geospatial discovery of nearby impacts, auto-login, Android native notifications, etc.
- **IRCTC Web Application Redesign:** Developed a fully redesigned and modern version of the IRCTC platform using React.js and Supabase focused on improving user experience, responsiveness, and usability. Implemented a Train Ticket Booking System with real-time search, seat availability checks, passenger details and fare summary. Implemented Hotel Booking & Travel Package features including ratings, amenities and pricing.

EXTRA-CURRICULAR ACTIVITIES

- Best Domain Specific Award in GenAI domain at Convene 2024 (SKN, Pune)
- Published review paper in UGC Care Journal (Jan 2024) - Dynamic Wireless Power Transfer System for EVs & its applications in India.
- Freelance Flutter App Developer - Built an IoT-enabled smart bell app using Flutter, Firebase and API integrations for real-time control and alerts.

CERTIFICATION

- Intel Unnati AI/ML Training Program
- AICTE Juniper Cloud Computing Virtual Internship
