Databases:	MySQL, MongoDB, PostgreSQL(Exposure)
Tools/Technologies:	Canva, Figma, Git, GitHub, Jupyter Notebook, Google Colab, Firebase, Supabase
Soft Skills:	Emotional Intelligence, Creative Thinking, Leadership, Communication, Teamwork

EXPERIENCE

Trainee Software Engineer
Equations Work Pvt. Ltd.

Jan 2025 - March 2025
Pune, MH

- Built a fully deployable financial prediction 3D website with near real-time news processing - 98% accurate prediction.
- Handled the 3D canvas efficiently & reduced the latency in 3D object mapping by using Mediapipe & Babylon.js.
- Smoothened the object movement by hand gesture management.

PROJECTS

GenAI Interactive Learning Games: Built an AI-powered aptitude quiz platform using OpenRouter API, generating real-time MCQs across Verbal, Logical and Math categories with difficulty-level filtering. Implemented a dynamic scoring and badge system with user progress tracking and interactive frontend with Streamlit UI including Flask, leaderboard and user authentication.

TruthLens - Misinformation Detection WebApp: Developed a full-stack misinformation detection system on Google Cloud Platform using React, FastAPI, Cloud Run and Firebase Hosting. Engineered a dual-AI backend: Gemini API (DDGS) for general multi-modal analysis and Vertex AI (Google Search) for deep fact-checking.

IRCTC Web Application Redesign: Developed a fully redesigned and modern version of the IRCTC platform using React.js, Node.js and Supabase focused on improving user experience, responsiveness, and usability. Implemented a Train Ticket Booking System with real-time search, seat availability checks, passenger details and fare summary. Implemented Hotel Booking & Travel Package features including ratings, amenities and pricing.

EXTRA-CURRICULAR ACTIVITIES

- Best Domain Specific Award in GenAI domain at Convene 2024 (SKN, Pune)
- Published review paper in UGC Care Journal (Jan 2024) – Dynamic Wireless Power Transfer System for EVs & its applications in India.
- Freelance Flutter App Developer - Built an IoT-enabled smart bell app using Flutter, Firebase and API integrations for real-time control and alerts.

CERTIFICATION

- Intel Unnati AI/ML Training Program
- AICTE Juniper Cloud Computing Virtual Internship
