Summary

Aspiring Software Developer with experience in building scalable web applications and RESTful APIs. Proficient in React, Node.js, SQL/NoSQL databases, and backend integration using modern development practices.

Education

Marathwada Mitra Mandal's College of Engineering

Bachelor of Engineering 8.43 GPA

November 2022 – Present

Pune, Maharashtra

Skills

Programming Languages: Python, C, C++, Java, JavaScript, TypeScript, SQL

Web Development: React.js, Node.js, Express.js, HTML5, CSS3, Bootstrap, RESTful API Development

Databases: MySQL, PostgreSQL, MongoDB

Tools & Platforms: Git, Linux, Firebase, Postman, VS Code, Blender

Development Practices: Full-Stack Development, OOP, API Integration, Database Design, Version Control, Debugging

Experience

HustleBee Softwares Pvt. Ltd.

Software Development Intern

January 2025 – April 2025

Pune, Maharashtra

- Designed and developed 15+ RESTful APIs using NestJS for efficient CRUD operations, reducing server response time by 30% and improving user experience.
- Gained hands-on experience in full-stack development, secure token-based authentication, and optimized backend architecture following industry best practices.

Projects

Morbus – Disease Prediction App | *Python, Pandas, Sklearn, Streamlit*

- Built a disease prediction web app achieving 85% accuracy using Random Forest and Linear Regression algorithms.
- Processed 10,000+ health records through data cleaning, encoding, and feature selection to enhance model performance.
- Deployed via Streamlit to provide real-time results, reducing manual diagnostic effort by 30%.

ATM UI Simulator | *Python, Tkinter*

- Designed a GUI-based ATM simulation with 8 interactive frames supporting 5 transaction types, including withdrawals and balance checks.
- Enabled secure PIN verification and transaction logging using Python event-driven programming.

Student List Dashboard | *React, Firebase*

- Built an admin dashboard for managing student data using Firebase Authentication and Realtime Database.
- Implemented secure email-password login, and enabled real-time CRUD operations for a dataset of 100+ students.

Employee Management System | *Java, JDBC, MySQL*

- Created a role-based employee management system handling 200+ records with CRUD support and report generation.
- Integrated MySQL database with JDBC and optimized SQL queries, reducing data retrieval latency by 15%.
- Implemented RBAC (Role-Based Access Control) to minimize unauthorized access by 60%.

Certifications

- | | |
|---|------------|
| • MongoDB for Developers – MongoDB University (Online) | June 2025 |
| • AWS Academy Cloud Foundations – AWS Academy (Online) | May 2025 |
| • Introduction to Cisco Packet Tracer – Cisco Networking Academy (Online) | April 2024 |
