Pune

SKILLS

Programming Languages: SQL, Python, Java, C++

Databases: Oracle, PostgreSQL

Technologies: Cloud Computing, AI/ML

Soft Skills: Problem Solving, Team Collaboration, Adaptability, Critical Thinking

EDUCATION

B.E. in Computer Engineering

Marathwada Mitra Mandal
College of Engineering

2022-2026

CGPA: 9.49

Higher Secondary Education (12th)

Dayanand Science College,
Latur

2020-2022

Percentage: 81.60%

CERTIFICATIONS

- AI-ML Certification - Intel Unnati
- Python Certification - Udemy
- Java Certification - Udemy
- Cloud Architecture Certification - AWS Eduskills
- Cybersecurity Fundamentals Certification - Zscaler
- Backend Development Certification - QSpiders

PROFILE

Detail-oriented Full Stack Developer and Computer Engineering student with a strong foundation in programming, cloud computing, and data engineering. Experienced in developing scalable applications and implementing innovative solutions with a focus on cybersecurity. Demonstrated academic excellence and practical experience through internships, demonstrating a commitment to continuous learning and professional development

WORK EXPERIENCE

Software Developer Intern

HustleBee

February 2025 - May 2025

Contributed to production-ready modules and features as a full-stack software developer. Built and optimized scalable web and mobile applications, collaborated with cross-functional teams to improve overall product performance.

Cloud Computing Intern

AICTE Internship

January 2024 - March 2024

Focused on AWS cloud technologies, deploying and managing cloud applications, which improved services' uptime and performance.

Data Engineering Intern

Zscaler Academy

April 2024 - June 2024

Worked on data engineering concepts, leveraging tools and techniques to streamline data processing workflows, resulting in increased data accessibility and usability.

PROJECTS

Mall Customer Segmentation using SOM

Utilized Self-Organizing Maps (SOM) with Python for clustering customer data, identifying spending patterns and demographics to drive targeted marketing.

Doctor & Patient App

Developed a role-based healthcare app with doctor discovery, appointments, real-time tracking, and prescription uploads. Integrated Google login and Mapbox.

AI Notes App using Ionic React

Developed a cross-platform note-taking app using Ionic React and Firebase. Integrated features like voice-to-text transcription, OCR-based image scanning, smart categorization, and secure user authentication with Google login.

Tele-ICU System

Implemented a deep learning-based AI/ML system for ICU monitoring; analyzed patient gestures and vitals to detect anomalies, providing predictive healthcare insights significantly.
