SUMMARY

Final-year Computer Engineering student with hands-on experience in AI/ML and backend development. Passionate about building scalable, real-world tech solutions through continuous learning and teamwork. Led campus initiatives as CSI Secretary and GDSC Marketing Head, thriving in collaborative environments. Strong in communication, leadership, and problem-solving.

TECHNICAL SKILLS

Languages: Python, C++, HTML, CSS

Frameworks & Tools: FastAPI, Flask, Streamlit, Git, Jupyter Notebook, XAMPP

Databases: PostgreSQL, MySQL, MongoDB, SQLite

AI/ML: TensorFlow, Keras, Scikit-learn, Pandas, NumPy, Matplotlib, Deep Learning, Generative AI

Core CS Concepts: Data Structures & Algorithms, OOP, OS, DBMS, CN

Soft Skills: Teamwork, Communication, Leadership, Problem-Solving, Adaptability, Creativity

EXPERIENCE

Machine Learning Research Intern
Jan 2025 – Mar 2025

Vishwas Vaidya (Engineering Consultant), Pune

- Developed a hybrid **Random Forest + LSTM** model to predict Remaining Useful Life (RUL) of halogen brake lamps with **98% accuracy**.
- Engineered preprocessing and feature extraction pipelines improving model robustness and interpretability.
- Created visual dashboards in **Streamlit** for real-time performance insights.

PROJECTS

Accentify — AI-Powered Shlok Learning Platform

- Built a RESTful backend using **FastAPI** with a React frontend for real-time pronunciation scoring.
- Integrated **OpenAI Whisper** for transcription and designed a custom evaluation algorithm for word-level accuracy.
- Architected a multilingual **PostgreSQL** database supporting Devanagari and English scripts.
- Tech Stack: FastAPI, React, PostgreSQL, SQLAlchemy, OpenAI Whisper API*

GenAI Interactive Learning Game

- Developed an AI-powered learning platform using **Streamlit** and OpenAI API for personalized quizzes and feedback.
- Implemented an adaptive difficulty engine to tailor question levels based on user performance.
- Tech Stack: Python, Streamlit, SQLite, Gemini API, Pandas*

Total Electron Content (TEC) Prediction

- Designed an **LSTM-based model** to forecast space weather and TEC variations impacting aviation and satellite systems.
- Applied normalization, feature scaling, and hyperparameter tuning to enhance accuracy.
- Tools: Python, TensorFlow, NumPy, Matplotlib*

EDUCATION

Bachelor of Engineering (Computer Engineering)	Marathwada Mitramandal College of Engineering, Pune (2026)
Higher Secondary (HSC)	MES Higher Secondary School, Pune (2022)
Secondary (SSC)	Bal Shikshan Mandir English Medium School, Pune (2020)

CERTIFICATIONS

- Complete AI and Machine Learning, Data Science Bootcamp (Udemy)
- Deep Learning A–Z 2025: Neural Networks, AI & ChatGPT (Udemy)

ACHIEVEMENTS & LEADERSHIP

- **Secretary — Computer Society of India (CSI):** Led a 15-member team organizing campus-wide technical events.
- **Marketing Head — GDSC:** Increased event participation by **40%** through strategic digital campaigns.
- Secured **Top 10 position** in Internal Smart India Hackathon 2025.
