## EDUCATION:

---

**Marathwada Mitra Mandal college of engineering, Pune**

2022– 2026

B.E. - Information Technology - CGPA: 9.40

**Arts, Science and Commerce College, Rahuri**

2020 – 2022

HSC Percentage - 74.33

**Shri Chhatrapati Shivaji Highschool, Rahuri Factory**

2019 – 2020

SSC Percentage - 91.00

## TECHNICAL SKILLS:

---

**Design and prototyping:** Figma, Canva

**Languages:** java, C++, JavaScript, Nodejs, Express,

**Database:** MongoDB, MySQL

**Core CS:** OOP, Data Structures, DBMS, OS, CN, React

**Tools:** MS-Excel, Postman, Visual Studio code

## PROJECTS:

---

### 1. Protection of Clothes from Rain:

- This project utilizes an Arduino, rain-drop sensor, LDR light sensor, servo motor, and essential components like jumper wires and cables to create an intelligent rain protection system.
- The system dynamically adjusts canopies, drying racks, heating elements, and fans based on real-time rain intensity and light conditions, ensuring optimal energy efficiency and effective drying performance.

### 2. Fake News Detection Using Machine Learning:

- Technologies Used:** HTML, CSS, JavaScript, Python, Scikit-learn, Pandas, NumPy.
- This system uses machine learning models trained on labelled news datasets to automate the detection of fake news, predicting the authenticity of articles based on their content.

### 3. Online shopping platform:

- Technologies Used:** React.js, JavaScript, Node.js, MongoDB
- This project is an e-commerce web application designed to showcase and sell various clothing items. The platform displays different categories of clothes along with their prices and includes a dedicated field for discounts.
- When a discount is applied, the system automatically calculates and shows the final price of the product after discount deduction. Additionally, the platform features a secure payment section, allowing users to complete their purchases conveniently. The aim is to provide a simple, user-friendly shopping experience.

## Experience:

---

### **Bluestock Fintech: SDE Intern (Full-Stack Developer) :**

- a) Developed a high-performance trading web app using React.js and Node.js, with MongoDB for data management.
- b) Implemented responsive UIs, secure RESTful APIs, and optimized system performance for a seamless user experience. Gained hands-on experience in full-stack development and fintech system

## CERTIFICATIONS

---

- a) **AICTE** - Edu Skills Virtual Internship
- b) **UDAAN 2K23** (In Project Spectacles)

## AWARDS

---

**Marathwada Mitra Mandal's College of Engineering: UDAAN-2K23 - Securing Second Price in Project Spectacle**  
**Automatic Protection of Clothes from Rain:** Developed an automated rain protection system that adjusts canopies, drying racks, and controls heating elements and fans based on rain intensity, optimizing energy usage and drying efficiency. Components that are used are Rain-Drop sensor, Arduino, Jumper Wires, Servo Motor, LDR Light Sensor, Cabel etc.
