## PROFILE SUMMARY

Computer Engineering student with a genuine passion for leveraging technology to solve real-world problems. Looking for opportunities to learn and grow especially in areas like secure system design, data analysis, and building reliable software. Through hands-on work with advanced tools and real-world digital challenges, I aim to develop strong solutions that are both impactful and trustworthy.

## EDUCATION

- **Marathwada Mitramandal College of Engineering** 2022 – 2026  
*Bachelor of Engineering in Computer Engineering* Pune

## EXPERIENCE

**Resecurity – Cyber Threat Intelligence Analyst Intern** Jan 2025 – May 2025  
*Internship*

- Contributed to cyber threat intelligence gathering and fraud investigations by analyzing data leaks and identifying threat actors through dark web reconnaissance.
- Mapped domain activity across multiple countries to uncover malicious infrastructure, and documented the deployment of vulnerable applications and remote access tools (RATs).
- Developed visualizations of cyberattack trends and compiled internal cybersecurity knowledge resources for training and research purposes.

**Ebix Technologies Ltd. – Intern** Jun 2025 – Aug 2025  
*Internship*

- Gained theoretical and practical knowledge of encryption, decryption, hashing, and key management, with hands-on exposure to AES, RSA, etc.
- Developed Spring Boot-based secure login/signup modules with client-side encryption integration.
- Built secure interfaces over WhatsApp and web for communication between field and bank agents in a loan collections system, integrating Large Language Models (LLMs) and Retrieval-Augmented Generation (RAG).

## PROJECTS

- **Fake News Predictor**  
Built a fake news detection system using PassiveAggressiveClassifier with TF-IDF vectorization and text preprocessing to enhance accuracy, and developed a responsive web interface using React and Node.js for seamless user experience.
- **Customer Lifetime Value Prediction**  
Created a predictive model for Customer Lifetime Value (CLV) using LightGBM Regressor, leveraging demographic, behavioral, and financial data. Enhanced prediction accuracy through data preprocessing and feature engineering techniques.
- **Football Goal Analysis System**  
Developed a system to analyze football matches using the Expected Goals (xG) model. Implemented xG metrics to assess the quality of goal-scoring opportunities and analyzed match data to deliver insights on team and player performance.

## SKILLS

**Languages:** Python, C++, Java, Javascript  
**Frameworks/Libraries:** SpringBoot, React.js, Node.js  
**Tools:** Nmap, Metasploit, Wireshark, Burp-suite, Kali Linux, GitHub  
**Soft Skills:** Problem Solving, Adaptability, Collaboration

## CERTIFICATIONS & COURSES

- **MongoDB:** Introduction to MongoDB
- **Cisco:** Introduction to Cyber Security
