SUMMARY

I am an engineering student pursuing a degree in Information Technology, known for being organized, proactive, and an effective communicator. With a strong foundation in programming, problem-solving, and project management, I am passionate about learning and contributing to dynamic software development teams. I am seeking an opportunity to apply my skills in a challenging environment that fosters both job satisfaction and professional growth.

EDUCATION

Marathwada Mitra Mandal College of Engineering, Pune 2022 – 2026
B.E. in Information Technology CGPA: 8.86

SKILLS

Languages: C++, C, Python, TypeScript	Frontend: React.js, Angular, HTML, CSS
Backend: Node.js, Express.js	Databases: MySQL, MongoDB
Systems: Linux/Unix environments	Tools: Postman, Docker, Jenkins, Git, WordPress

WORK EXPERIENCE

iDream Advisory Pvt. Ltd., Pune Jan 2025 – Apr 2025

Web Development Intern

Technologies: React.js, JavaScript, REST API, WordPress, Google Sheets API, Chart.js, SEO, Git/GitHub, HTML5, CSS3

- Built and deployed **Vibe-Score**, an employee engagement tool using React.js and Chart.js, cutting survey processing time by 90%.
- Improved website SEO and performance, boosting organic traffic by 38% and reducing load speed by 45% across 35+ pages.
- Created an automated dashboard that converted Excel uploads into charts and insights, reducing data analysis time by 60%.
- Collaborated with design and development teams to refine website UX, boosting Google search engagement by 35% contributing to overall business growth.

Yarasi Tech, Pune

May 2024 – Sep 2024

Web Development Intern

Technologies: Angular, TypeScript, HTML5, CSS3, REST APIs, GraphQL, Git, Google Cloud Service

- Developed responsive, mobile-optimized web applications using Angular and TypeScript, achieving 95% cross-browser compatibility and faster load times on mobile devices.
- Built modular and reusable Angular components, accelerating feature development and ensuring scalable, maintainable code.
- Integrated REST APIs and GraphQL with backend team, enhancing data efficiency and overall user experience.
- Collaborated with designers and backend developers to refine UX and application flow, contributing to higher user engagement.

PROJECT WORK

• AI-Driven Legal Research Engine for Commercial Courts

Technologies: Flask, HuggingFace Transformers, TensorFlow, NLP, REST APIs, HTML, CSS

- Developed an AI-powered platform to assist judges and lawyers in quickly retrieving relevant case laws and summaries
- Integrated NLP models to enable semantic understanding of legal texts and suggest the most relevant precedents
- Deployed TensorFlow-based classifiers to significantly reduce manual research time and enhance decision-making support

• Hand Gesture Controlled Ping Pong Game

Technologies: OpenCV, MediaPipe, Pygame, Python

- Designed a real-time interactive game that allows control of the paddle using hand gestures instead of traditional input devices
- Employed MediaPipe for accurate hand landmark detection and OpenCV for capturing live video frames
- Implemented physics such as ball movement and collision detection in Pygame to create a smooth gameplay experience

• Web Server in C++

Technologies: C++, Sockets, HTTP, File Handling, System Calls, Docker, Jenkins

- Built a basic HTTP web server capable of handling client requests and serving static HTML pages efficiently
- Utilized C++ socket programming to manage client-server communication and request parsing
- Applied low-level networking and file handling concepts to gain practical understanding of web server infrastructure

ACHIEVEMENTS

- Secured 2nd prize in Udaan Quiz Competition.
- Ranked among the top 15 teams in Smart India Hackathon (SIH).
- Achieved top 15% coder on LeetCode and a Codeforces rating of 1200.
