EXPERIENCE

ZappyTots | Front End Intern

Mumbai, India | Dec 2024 - Jan 2025

- Contributed to the development of Zappy Tots, a pretend-play toy brand focusing on skill-based learning through play.
- Built and optimized the website interface (zappytots.com), improving user experience and visual appeal.
- Worked on data-driven insights for toy categorization and recommendation features using Python and basic machine learning models.
- Collaborated with the content and design teams to align technical components with brand goals and educational outcomes.

PROJECTS / OPEN-SOURCE

AI Blog Generator | [Link](#)

AI Blog Generator is a project that automates blog content creation using OpenAI's API. Users can input topics or prompts, and the AI generates high-quality blog articles. The tool is designed to speed up content creation while maintaining readability and relevance.

News Summarizer | [Link](#)

It is an AI-powered news aggregator that fetches articles from multiple online sources, extracts key information, and summarizes the news using OpenAI's API. It stores results in a structured format for easy access and analysis.

TavilyChatbot | [Link](#)

TavilyChatbot is an interactive AI chatbot accessible via a web interface. Users can chat with the AI in real-time, and the backend leverages OpenAI's API to generate intelligent responses with help of Tavily Search. The front-end is designed to provide a smooth user experience.
