Profile

Final year Computer Engineering student with strong programming skills and a passion for technology. Adaptable, thriving in both independent and team environments. Eager to grow in software development and data science roles with a focus on learning and expanding technical skills.

Skills

- Programming Languages: Python, C++
- Web Technologies: HTML, CSS, JavaScript
- Tools: VS Code, NetBeans, Git
- AI & ML: Familiar with basic ML models

Education

B.E. in Computer Engineering
MMCOE, Pune University
2022 – 2026
CGPA: 9.02 (3rd Yr)

XII (HSC)
SP College, Pune
2020 – 2022
Percentage: 75.17%

Certifications

- Front-End Web Developer Certification – Infosys Springboard, Apr 2025
- Introduction to MongoDB – MongoDB University, Jun 2025

Internship & Training

AICTE–EduSkills Virtual Internship

Trainee | Jan–Mar 2025

- Completed AI-ML virtual internship under AICTE & EduSkills in collaboration with Google Developers.
- Built a Flower Classification Web App using Python, TensorFlow, and Gradio to identify flower species from images in real-time.

Projects

❖ Morbus Predicto (Disease Prediction Website)

Tech : HTML, CSS, JavaScript, Python, VS Code
Developed a basic frontend web app to predict health risks based on user input.

Outcome : Used simple algorithms to provide risk predictions through an intuitive UI.

❖ Booking Engine

Tech : HTML, CSS, JavaScript, Firebase

Created a real-time booking system with form validation.

Outcome : Simulated complete booking flow with live Firebase syncing and user input validation.

❖ Quiz Management System

Tech : Java, NetBeans, MySQL

Developed a desktop app to manage quizzes and store results.

Outcome : Automated score calculation and stored results using MySQL for reliable quiz management.
