## ABOUT ME

Motivated Computer Engineering student with hands-on experience in React, Node.js, Python, and 3D visualization (Babylon.js). Interested in AI/ML, full-stack projects, and building user-centric tech products. Adaptable and fast learner and passionate about delivering clean, scalable solutions.

## EDUCATION

|                                                                                                                  |                                    |
|------------------------------------------------------------------------------------------------------------------|------------------------------------|
| Marathwada Mitra Mandal's College of Engineering (MMCOE)<br><i>Bachelor of Engineering in Computer Science</i>   | Maharashtra<br>Aug. 2022 – Present |

| Future News 3D Visualization   <i>Babylon.js, TypeScript, React, Python, Figma, NLP</i>                                                                                                                                                                                                                                                                                            | Jan – March 2025   |
| <ul style="list-style-type: none"><li>Implemented Python-based data scraping and REST API development for real-time news updates and efficient frontend-backend connectivity.</li><li>Collaborated on a web-based 3D visualization tool using Babylon.js, integrating gesture-based controls (rotate, delete, update) and a user-centric interface with Figma and React.</li></ul> |                    |
| Smart Energy Consumption Dashboard   <i>React, Node.js, Express, MongoDB, Chart.js, Tailwind CSS</i>                                                                                                                                                                                                                                                                               | Jan 2023 – Present |
| <ul style="list-style-type: none"><li>Designed a full-stack dashboard with Node.js, Express, and MongoDB to visualize household energy usage, including secure JWT authentication and scalable data storage.</li><li>Implemented Chart.js for dynamic energy pattern visualization and styled with Tailwind CSS for a modern, responsive UI</li></ul>                              |                    |

## TECHNICAL SKILLS

Languages: Python, C++, JavaScript, TypeScript, SQL, C#, HTML, CSS, MongoDB, Tailwind CSS

Frontend: React.js, Angular, Bootstrap

Backend: Node.js, Flask, FastAPI, RESTful API Design, GraphQL

Databases: MySQL, PostgreSQL, MongoDB, Azure SQL Database

Developer Tools: Git, GitHub, VS Code, Eclipse, Figma, Geany

Libraries/Tools: Babylon.js, pandas, NumPy, Matplotlib, Chart.js, MediaPipe

Cloud & Data Tools: Azure Data Factory, Data Lake Storage Gen2, SQL Database, Databricks

## CERTIFICATIONS
