

Varad Vinod Raut

📍 Pune ✉ varadraut2022.it@mmcoe.edu.in ☎ +91 9881401161 🌐 Github 🚀 LeetCode

Summary

Final-year IT undergraduate with 2 internships, 5+ full-stack projects, and 200+ LeetCode problems solved. Proficient in React.js, React Native, Node.js, and databases, with a proven record of engineering applications that reduced manual work by 80% and accelerated industrial monitoring efficiency by 40%. .

Education

Marathwada Mitra Mandal College of Engineering 2022 – 2026
BE in Information Technology (Current)

- **Coursework:** Data Structures and Algorithms, Operating Systems, Computer Networks, Database Management System, Software Engineering, Embedded Systems and IOT (exposure)

Skills

- **Programming Languages:** C++, Python, Java, JavaScript
- **Core CS Concepts:** Data Structures & Algorithms, Object-Oriented Programming, Database Management System
- **Embedded & IoT:** Real-time systems, Device Communication, IoT Protocols (MQTT, Firebase Realtime DB)
- **Full Stack Development:** React.js, Node.js, Express.js, MongoDB, React Native, Firebase, MySQL, Postman
- **Tools & Version Control:** Git, GitHub, Expo

Internships

FMCII & S.S. Groups – Intern Jul 2025 – Present

- Architected an IoT-based real-time monitoring system for 20+ industrial panels, reducing fault detection time by 40%.
- Integrated MQTT protocol, Firebase Realtime DB, and React Native app to deliver instant alerts with less than 5s latency.
- Enhanced historical fault tracking, improving troubleshooting efficiency by 30%.

Techno Building Products Pvt. Ltd. – Intern May 2025 – Jul 2025

- Engineered a Python-based automation tool that reduced ceiling cost estimation time and increasing efficiency by 90%.
- Architected a Raw Material Inventory Management System handling 500+ stock items, improving accuracy by 35%.
- Streamlined stock forecasting, cutting material shortages by 25% and improving workflow efficiency.

Projects

IoT Fault Monitoring & Alert System (Insulink) [🔗](#) Jul 2025 – Present

- Engineered a real-time IoT monitoring system for electrical panels with instant fault detection (less than 5s latency).
- Deployed historical data storage for 1000+ records, improving maintenance analysis.
- Tools Used: React Native, Firebase, MQTT

Raw Material Inventory Management System [🔗](#) May 2025 – Jul 2025

- Developed full-stack web app with CRUD operations and low-stock alerts for 500+ materials.
- Constructed secure backend (JWT-based auth) with responsive UI, reducing manual errors by 30%.

- Tools Used: MERN Stack

Python-based Ceiling Estimation Tool [↗](#)

May 2025 – Jul 2025

- Automated cost estimation for designer ceilings, reducing manual effort by 90%.
- Increased workflow efficiency across 3+ departments using the tool.
- Tools Used: Python, Tkinter, Hugging Face

E-Wallet Mobile Application [↗](#)

2025

- Created e-wallet app with secure login and transaction tracking for 50+ test users.
- Processed 1000+ test transactions with 100% accuracy across Android & iOS.
- Tools Used: React Native, Firebase

E-Commerce Platform (Razorpay Integration) [↗](#)

2025

- Delivered shopping platform with cart, authentication, and order tracking for 100+ demo users.
- Integrated Razorpay API for secure payments, processing 50k+ in test transactions.
- Tools Used: MERN Stack

Achievements

- Solved 200+ LeetCode and 50+ GFG problems (top 64.5% globally in contests).
- Achieved 4 stars in C++ and 3 stars in SQL on HackerRank
- Competed in 2 hackathons, delivering working prototypes under tight deadlines.
